### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Michael H. Brodowski on 8/17/2006.

The application has been amended as follows:

Claims 10 and 22, line 7, after "contacting", the phrase - -the adhesive on- - has been inserted.

Claim 10, line 13, the phrase "substantially separated by perforations" has been replaced by - -separated by the first portion and by perforations between the first portion and second portion, and by perforations between the first portion and the third portion- -.

Claim 22, line 15, the article "and" has been deleted.

Claim 22, line 17, after "adhesive", the phrase - - wherein the second and the third portions are separated by the perforations and the first portion- - has been added.

2. The following is an examiner's statement of reasons for allowance:

A review of applicants' arguments made in the amendment filed on 6/5/2006 and a review of the instant amended claims has convinced the examiner that the claims are allowable over the prior art of record. The prior art fails to teach or suggest a method of

Art Unit: 1772

making a label including the steps of deadening a first portion of the adhesive on the back side of a label, applying ink to the deadened portion and contacting the adhesive with a release liner, (i) forming a label comprising a first, second and third portions, with both the second and third being adhesive portions that are in proximate to the first deadened portion and are separated by the first portion and perforations; or (ii) perforating the interface between the first portion and the second portion, and perforating the interface between the first portion and the third portion forming a label comprising a first, second and third portions, with both the second and third being adhesive portions that are in proximate to the first deadened portion and are separated by the first portion and the perforations. Also, no evidentiary support could be provided to support the position that the instant claimed invention would have been obvious to one having ordinary skill in the art.

The closest prior art SCHULLER (US 20050055637A1) teaches a method of making a label comprising a first, second and third portions (figures 4A and 4B) but fails to teach that the second and third portions are separated by the first portion and perforations.

KORONDI (5702127) teaches a method making a label comprising first, second and third portions (figure-1) but fails to teach the step of applying ink to the first portion.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
